Exam : **C_TSCM62_66**

Title : SAP Certified Application Associate - Sales and Distribution, ERP 6.0 EhP6

Version : DEMO

1.If the material entered in the sales order is not available, how is the user alerted to this situation?
A. The availability control screen is displayed.
B. The system automatically sets the order quantity to zero.
C. The incompletion log displays the unconfirmed schedule line as a missing field.
D. The system highlights the schedule line.
Answer: A

2.Which of the following elements can directly influence whether an availability check will be performed? (Choose two)
A. The schedule line category in the sales document
B. The item category in the sales document
C. The delivery type
D. The checking group in the material master
Answer: A, D

3.According to the system, there is no stock available; however, you still receive a confirmed schedule line in the sales order.
What is the reason for this confirmation?
A. Inventory management creates a stock transfer when the sales order is saved.
B. The availability check was carried out, and on saving, the system immediately rescheduled the sales order according to the customer priority.
C. The availability check that was carried out included a replenishment lead time in the scope of check.
D. The system automatically searches other plants for inventory and transfers this inventory to the plant with zero inventory in the sales order.
Answer: C

4.Based on which of the following dates is the availability check (ATP) carried out?
A. Requested delivery date
B. Material availability date
C. Confirmed delivery date
D. Replenishment lead date
Answer: B

5.In which of the following scenarios can you use the material listing function?
A. To set a list of materials that the customer can buy
B. To generate a detailed report about materials
C. To set a list of materials that the customer cannot buy
D. To group materials to different lists
Answer: A
