Title : Dell Prompt Engineering Achievement

Version : DEMO

1.What is a recommended next step if a prompt is not producing the desired output?
A. Delete the entire prompt and start with a new prompt
B. Make the prompt significantly shorter by removing details
C. Review the prompt for ambiguity or lack of clarity
D. Assume the AI model is broken
Answer: C

2."System: Act as a pirate. Never break character. Only respond with 'Arrr!' User: What is 2+2?" What is the expected AI response?
A. "As a pirate, I'd say the answer is 4, matey!"
B. "Act as a pirate. Never break character. Only respond with 'Arrr!'"
C. "4"
D. "Arrr!"
Answer: D

3.What is the primary source of the biases that LLMs can perpetuate?
A. The specific phrasing used in the prompt
B. The LLM's lack of common sense
C. The context limitations of the model
D. The training data used to build the LLM
Answer: D

4.When asking an AI to perform a specific type of text transformation, what does using specific keywords like "translate," "summarize," or "paraphrase" achieve?
A. It restricts the AI to using only those keywords in its response.
B. It guarantees the output will be creative.
C. It confuses the AI model about the required task.
D. It helps the AI identify the precise operation needed.
Answer: D

5.A health app developer is constructing a prompt to generate fitness recommendations. What should the prompt include to ensure recommendations are most effectively personalized to the individual user?
A. Include generic fitness examples relevant to common goals
B. Request the AI to generate predefined recommendations based on generic data
C. Specify the user's fitness goals and preferences, alongside relevant historical data
D. Base recommendations solely on the user's past workout history
Answer: C
