Exam : **D-PEXE-OE-00**

Title : Dell PowerEdge XE Operate

Version : DEMO

1.Which issue is MOST likely if GPU nodes are added without proper compatibility validation?
A. Improved workload scheduling
B. Application instability
C. Faster firmware updates
D. Reduced power consumption
Answer: B

2.Which action should FOLLOW a firmware update to ensure operational stability?
A. Disable alerts
B. Perform validation testing
C. Increase workload density
D. Replace nodes
Answer: B

3.Which benefit does consistent firmware management provide?
A. Reduced need for monitoring
B. Improved system reliability
C. Elimination of hardware failures
D. Faster documentation updates
Answer: B

4.When should log files be sent to TechDirect?
A. During routine monitoring
B. When escalating unresolved issues
C. After every firmware update
D. Before running diagnostics
Answer: B

5.What is the PRIMARY benefit of stress testing GPU nodes?
A. Reducing monitoring requirements
B. Validating stability under peak load
C. Accelerating firmware updates
D. Lowering power consumption
Answer: B
