Title : IBM Tivoli Storage Sales Mastery Test v4

Version : DEMO

1.IBM's Storage Hypervisor is named_____.
A.IBM Hypervisor
B.IBM SAN Volume Controller
C.IBM SmartCloud Virtual Storage Center
D.IBM SmartCloud Virtual Storage Manager
Answer: C
Explanation: IBM SmartCloud Virtual Storage Center is a suite of products that includes SAN Volume Controller (SVC), Tivoli Storage Productivity Center (TPC), Tivoli Storage FlashCopy Manager, Tivoli Usage and Accounting Manager, Tivoli System Automation Application Manager, and Tivoli Storage Manager Suite for Unified Recovery.Some of these products are themselves bundles of other software items.
IBM defines its SVC product asa storage hypervisor platform and TPC as storage hypervisor management.

2.What Common capabilities does a storage Hypervisor provide?
A.Encryption
B.Can increase performance by using the EMC pass through driver
C.Thin provisioning
D.Scheduling
Answer: C
Explanation: IBM’s Storage Hypervisor is a both a storage virtualization (IBM SAN Volume Controller) and storage virtualization management (Tivoli Storage Productivity Center) platform that uses IBM’s Integrated Service Management paradigm.This should help avoid the flurry of concerns about management that accompanied the introduction of server virtualization.The service approach offers a way to standardize storage management routines such as LUN allocation by using a smallish set of templates and thin provisioning to give applications what they think they need.

3.Which product does NOT belong to theIBM SmartCloud Virtual Storage solution?
A.Tivoli Productivity Center
B.Tivoli Storage Manager
C.SAN Volume Controller
D.Flash Copy Manager
Answer: B
Explanation: IBM SmartCloud Virtual Storage solution include:
*
System Storage SAN Volume Controller Storagevirtualization platform providing common services and transparent mobility
*
Tivoli Storage Productivity Center Virtual storage management centralizing and automating management

of all storage resources

*

Tivoli Storage FlashCopy Manager Integrates Storagesnapshot with VMware and popular business applications on Windows, Unix, and Linux
