D. It disconnects all users except for users with Supervisor rights

Answer: B

9. Which of the following statements about the C5 Administrators user group are correct?

A. The group C5 Administrators does not as default have full rights to the entire system

B. All users must be members of group C5 Administrators

C. As default the Supervisor is a member of the group C5Administrators

D. The group C5 Administrators cannot be allocated specific rights to application elements

Answer: C

10. Which of the following statements about users and groups are correct?

A. A user can only be a member of a single group

B. A user must be a member of at least one group in order to be able to log onto the system

C. Only the user Supervisor can be a member of the group Everybody

D. You can allocate table rights to specific users

Answer: B

11. What rights can be allocated to tables?

A. Show, Correct, Create, Delete and Execute

B. Show, Correct, Create, Delete and Execute

C. Run (i.e. execute)

D. Edit, Run

Answer: B

12. What start-up parameters are used to start the program with a specific user?

A. -F

B. - B

C. - M

D. -U

Answer: D

13. Which line type should be chosen to calculate numerical values in the Ad-hoc Report Generator?

A. CM

B. STR

C. REAL

D. NUM

Answer: C

14. Which of the following statements are correct when you decide to save the job under execution in the data manipulation window?

A. When taking action, Export is saved as a QT

B. When taking action, Export is saved as an XAL jobT

C. When taking action, Import is saved as a QT

D. When taking action, Update is saved as a QT

Answer: A

15. Which of the followings statements are correct when as a normal user you decide during execution of a report in the Ad hoc Report Generator to save the report in XAL/C5?

A. The report is saved in the file C_UTIL.BUS

B. The report is saved in the file C_UTIL.SYS

C. The report is saved in the file C_UTIL.USR

D. The report is saved in the file C_USER.SYS

Answer: C

16. Which of the following kernel files run using the Windows user interface?

A. C5w32.exe

B. Cxalw32c.exe

C. C5w32c.exe

D. Cxal386.exe

Answer: A

17. Which of the following statements regarding rights to application elements are correct?

A. Groups can be allocated rights to view, correct, create and delete elements

B. The groups can be allocated rights to edit and execute elements

C. Passwords for the editing and execution of elements cannot be created

D. Only the Supervisor can be allocated rights to elements

Answer: B
