Exam : **MB6-503**

Title : AX 4.0 Product Builder

Version : DEMO

1.Database improvements to Microsoft Dynamics 4.0 include: Choose the 3 that apply.

A.A change to Unicode to help support data in more languages than Microsoft Dynamics AX 3.0.

B.RecID improvements that help increase performance and scalability.

C.A change in the Database Wizard to help make creating the database an easier task.

D.A change to optimistic concurrency that helps shorten the amount of time that database objects are locked.

Correct:A B D

2.A system implementer working with a customer on moving from Microsoft Dynamics AX 3.0 to Microsoft Dynamics AX 4.0. What important effect to the database must be considered before upgrading to Microsoft Dynamics AX 4.0?

A.The database can be converted without any special consideration.

B.The Microsoft Dynamics AX 3.0 database must be converted to Unicode before upgrading the data to Microsoft Dynamics AX 4.0.

C.The database cannot be upgraded but instead all the data must be manually exported from the old database and manually imported to the new database.

D.The upgrade checklist will automatically handle any needed changes to the database.

Correct:B

3.A customer asks the implementer to install their production Microsoft Dynamics AX 4.0 on a single computer, in order to save money. What response would be appropriate for the implementer to give to the customer? Choose the 2 that apply.

A.The single computer install should not be used in a production environment because of potential performance issues.

B.The only appropriate place for a single computer install at a customer site is for development and testing.

C.The single computer install would be the optimal install in a production environment.

D.The single computer install is for Partners only and should never be used at a customer site.

Correct:A B

4.Which of the following is true in relation to the Help languages in Microsoft Dynamics AX 4.0? Choose the 2 that apply.

A.It is possible to install help in multiple languages.

B.The Help files for all languages are now installed by default.

C.It is possible to view the Help files in multiple languages at one time on a Microsoft Dynamics AX 4.0 client.

D.Users can switch between Help languages by changing the user settings in the Microsoft Dynamics AX 4.0 client.

Correct:A D

5.The Application Object Server (AOS) has been changed to a true Windows Service. What are the advantages of this change? Choose the 3 that apply.

A.Improved server status reporting to the Windows event log. This lets administrators view errors and warnings that can help in troubleshooting problems.

B.Eliminating the dependency on the Microsoft Dynamics AX 4.0 Server Manager removes a security threat by which an attacker can send a command to the AOS to shut it down.

C.Changing to a true Windows Service means that the AOS service will always run as Administrator.

D.The AOS service can be configured to start at system startup and continue to run even when no user is

logged into the system.

Correct:A B D
